

**ENVIRONMENT AND ENERGY**

**2010**

### **Branch classification**

1. Energy generation
2. Power generation
3. Cogeneration
4. Energy distribution and storage
5. Electrotechnical equipment, materials
6. Industrial equipment, process automation and control
7. Energy saving lighting equipment
8. Heat generation and heating equipment
9. Heat insulation and thermal insulation of buildings
10. Housing management systems, energy audit, thermal imaging
11. Ventilation and air-conditioning systems and equipment
12. Natural gas production and distribution

### **Renewable energy sources**

1. Biofuel
2. Biogas
3. Geothermal power
4. Heat pumps
5. Hydropower
6. Hydrogen energy
7. Solar photovoltaic
8. Solar thermal
9. Wind power
10. Wood for energy
11. Transmission & distribution of energy from renewable sources
12. Water supply and sewerage
13. Rainwater use
14. Air pollution and treatment
15. Exhaust air treatment
16. Measuring and control equipment
17. Geological prospecting
18. Waste management
19. Environmental monitoring
20. Transport and communal services
21. Financing
22. Research, development
